

STRANDINGSMUSEET - THORSMINDE, DK

FACADES IN HIGH PERFORMANCE CONCRETE

FACTS

| | |
|--------------------|--|
| Year: | 2016 |
| Architect: | Frank Maali & Gemma Lalanda Arkitekter M.A.A. |
| Contractor: | Bjarne Ørts & Co. |
| Engineer: | Grue + Kirkegaard |
| Location: | Vesterhavsgade 6990 Ulfborg |

Hi-Con has supplied the museum with 90 facade elements in light CRC i2®. The 90 elements measure up to 100 millimeters in thickness and have a total area of 630 m².

The length of the facade elements varies between 1.1 - 15.5 meters and widths of either 0.8 - 1.27 - 1.31 or 1.35 meters.
